

Portable Projection Screens

*E-Z Fold &
E-Z Fold II*

THE
SCREEN
WORKS

Screen frames, legs, and component parts are assembled with durable, zinc plated, steel hinges and lock sets.

Interchangeable, snap-on front and rear vinyl projection surfaces attach easily to frame.

E-Z Fold Portable Projection Screens

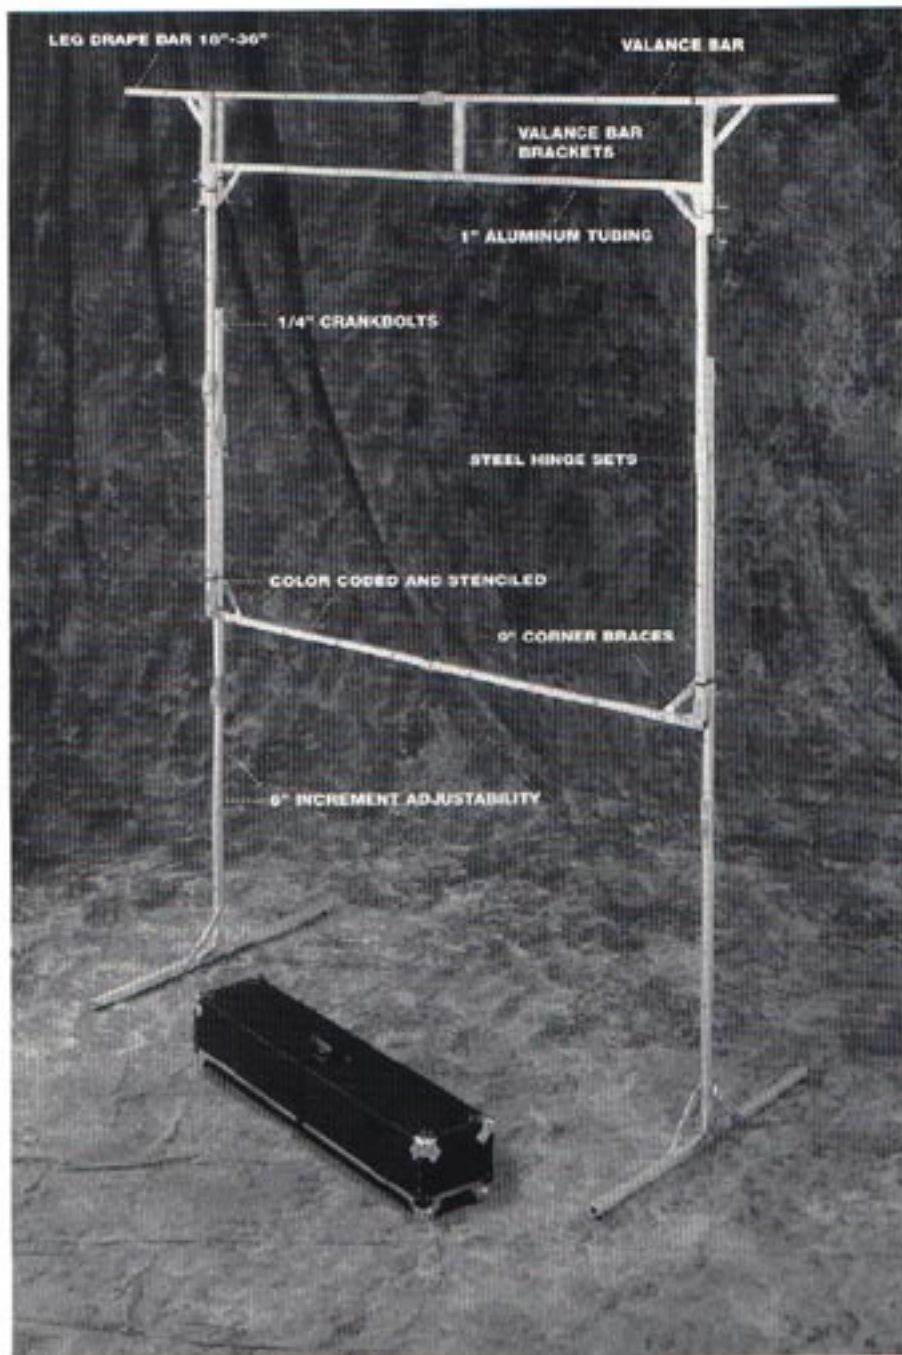

E-Z Fold portable projection screens are the choice of audio visual professionals worldwide. Whatever the application — conventions, trade shows, traveling events, off-site meetings, in-house facilities, corporate functions — The Screen Works has what you need.

• Lightweight and Durable

Frames are constructed of sturdy, lightweight 1" anodized aluminum with durable steel hinges and locks. Large format screens feature heavy-duty 6" truss construction for enhanced stability. Screens which require extra rigidity feature 6" truss support. Screen frame and legs fold down easily to fit into rugged, impact resistant poly vinyl cases for the utmost in travel convenience.

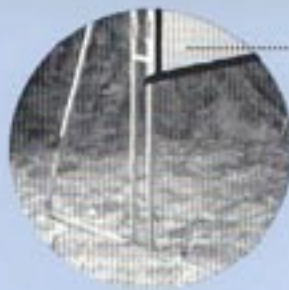

• Projection Surfaces

The Screen Works offers three interchangeable snap-on vinyl surfaces: rear projection material and matte white or matte brite for front projection. All screen surfaces come in a protective vinyl envelope. Ground cloths are included with rear surfaces that fit on truss frames. Custom surfaces can be ordered with grommets or snaps.

Truss supports are included with most *E-Z Fold* units and provide additional reinforcement and stability when attached to the rear of the frame.

Truss legs with or without leg braces are available as options for all *E-Z Fold* and *E-Z Fold II* screens.

E-Z Fold II Portable Projection Screens

Industry Compatible

• Easy to Assemble

No tools are required. Our easy-to-use crank bolts make assembly and set-up quick and easy. Screen frame height is adjustable in 6" increments.

• Industry Compatible

For our customers who have asked for "Industry Compatible" portable projection screens, *E-Z Fold II* is the perfect solution. *E-Z Fold II* screens feature the same high quality and value as our original *E-Z Fold* screens but are designed to fit and work with all other brands of folding screens.

"Compatibility" features of *E-Z Fold II* include: crank bolt and corner brace size, attachment of trim kit hardware, truss frame assembly and snap location.

• Standard or Custom

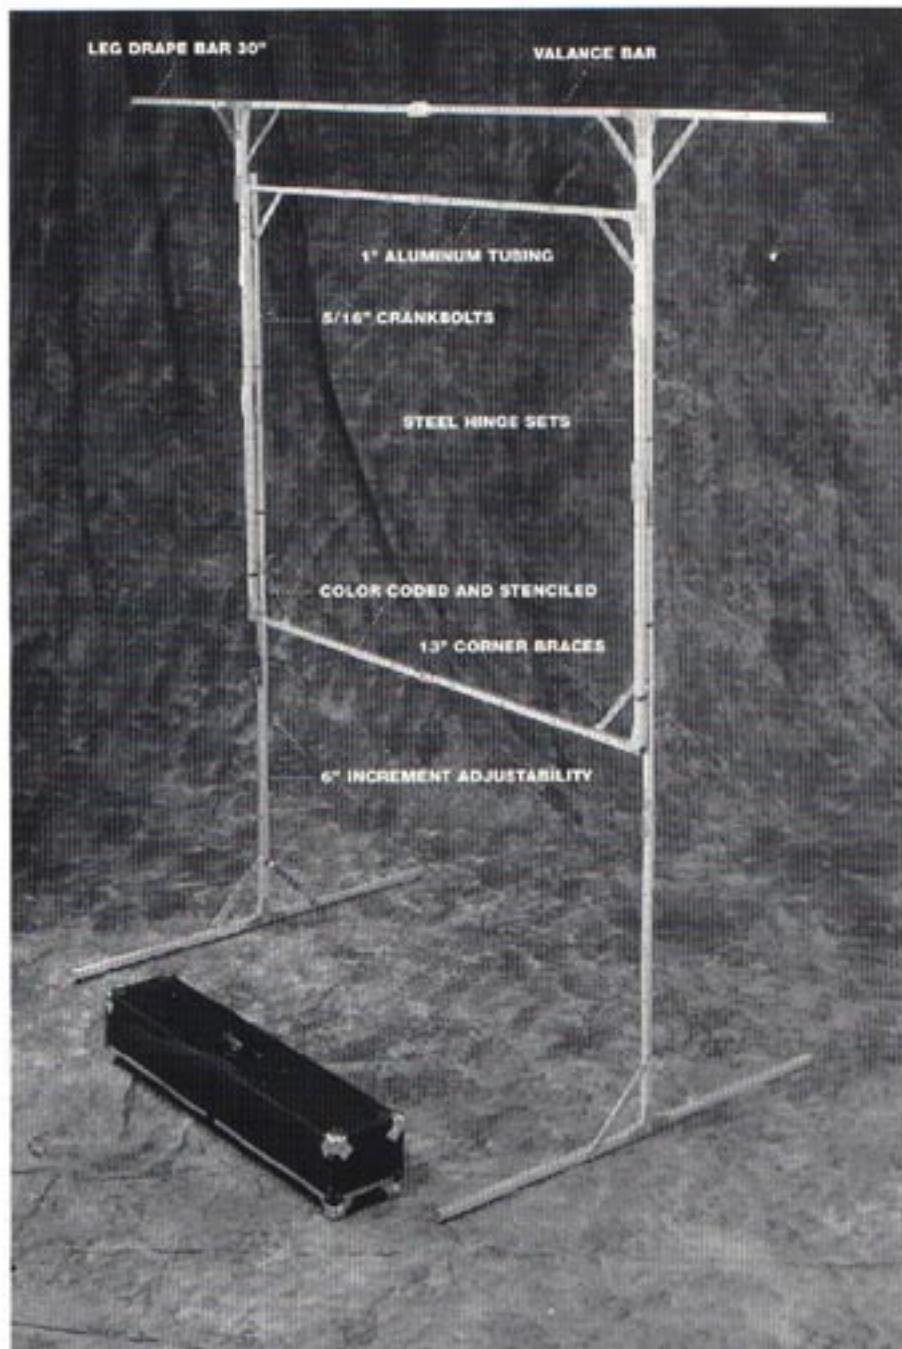

Choose from any of our 32 standard projection screen sizes, or we will design custom screens to your specifications.

• Complete Kits

All *E-Z Fold* and *E-Z Fold II* complete kits include: screen frame with legs, projection surface in envelope, hardware and poly vinyl case.

• Options

Heavy duty A-T legs, leg braces or 6" truss legs can be substituted for standard T-legs. These options are recommended for larger screen sizes and trim packages.

No tools are required!
Our crank bolts make
assembly quick and
easy.

E-Z Fold II features
"no tools" slide-on
assembly of trim kits.

E-Z Fold & E-Z Fold II Trim Kits

Our cotton velour Drapery Trim Kits give your presentation a dramatic stage-set appearance. Heavy weight, flame retardant box pleated panels surround the viewing screen to frame your presentation. Aside from a professional appearance, the panels also serve to hide projection equipment and eliminate light on rear-screen presentations.

Drapery Trim Kits include a skirt, two leg (side) drapes and a valance drape. All hardware necessary to attach trim to frame is included. Standard skirts are 4', however we can customize product to fit individual needs. Choose from four rich colors — blue, black, gray and burgundy, or select a custom shade. Optional rugged, poly vinyl cases are available for all trim kits. Skirt bars are available to adjust screen size and ratio.
